intimated Government that they would start the work on that portion of the road on which there was no dispute, employing their own capital, provided Government would reimburse them when funds became available. In addition to this, they also wrote to Government promising to indemnify them against any future loss on this account and undertaking to take a title from the Chief himself in case the dispute was settled in his favour. But in whatever way the suit might terminate, the member pleaded that the amount promised by Government should be paid as the road was absolutely necessary for the ingress and egress of about 5,000 of His Highness' subjects residing in the Hills.

Reply.—As you say, Government have decided not to spend money on the proposed road until the dispute between them and the Poonjat Chief over the tract of land along which the road was to be opened terminated in their favour. As I have already told you both orally and in writing, the willingness of the opposite party to your opening the road cannot be availed of by Government, without in some way giving room for the opinion that they admit his possession and thereby prejudicing their own interests. If you are prepared to put your capital on the construction of the road and have the same reimbursed by Government in case the present suit ends in their favour, there is no objection to your commencing the work. But as you say that you want the money back from Government in either case irrespective of the nature of the decision of the suit, the proposal cannot be easily agreed to but will have to be considered before orders are passed. In any case, the extension of the road to Yendar must lie over for the present.

238. State of the main road at Kanjirapalli.

Mr. H. D. Deane (*Rubber Planters' Association*) said that the Kanjirapalli road which was otherwise in an excellent condition was in some places in disrepair and requested that the attention of the Chief Engineer might be drawn to the matter.

Reply.—This road is being attended to. The delay in some places is due to a steam roller not being available in the locality.

239. Dispensary for Mundakayam.

Mr. H. D. Deane (*Rubber Planters' Association*) said that, even with the two private dispensaries opened by the planters, medical aid

in the locality which was highly feverish could not be said to be adequate. He requested that a Government dispensary also might be established at Mundakayam.

Reply.—The matter will be considered. I shall inspect the place shortly and after getting an idea of the number of people to be served decide whether a hospital or a grant-in-aid dispensary should be opened in the locality.

PADMANABHAPURAM DIVISION.

TOVALA TALUK.

240. Strengthening the present boundary line of the reserves by the construction of an ashlar wall.

Mr. R. Nambi Iyer (*Tovala*) represented that this was very necessary to prevent the inroads of wild beasts which now caused considerable damage to cultivation in the plains.

Reply.—Government have considered the question. The cost would be prohibitive and the resulting benefit very doubtful.

241. Opening a hospital in the centre of the Tovala taluk.

Mr. R. Nambi Iyer represented that the taluk was a mountainous and feverish one and that the people suffered much for want of a hospital, the one at Nagercoil being 12 miles away.

Reply.—It is not always possible to provide a separate hospital for each taluk. The necessity for a dispensary at Aramboly has been brought to the notice of Government and will receive consideration. Nagercoil is so situated that the hospital there would equally serve Tovala and Agastisvaram taluks.

242. Speedy construction of the Tovala channel.

Mr. R. Nambi Iyer and Mr. K. S. Shanmukham Pillai (*Agricultural Improvement Association, South Travancore*) requested that this work which was now held in abeyance might be proceeded with and completed as early as possible in the interests of the ryots.

Reply.—This will be commenced as soon as the letting out of
